

Cloud Solutions

SAP Global Trade Services (GTS)

Data content, SAP GTS system, and HW operation by PwC

www.pwc.de

Since 2010, we have been operating scalable SAP GTS solutions in the cloud for you which are suitable for any company size.

Seamlessly integrated

With the SAP GTS product, SAP introduced in 2003 a solution which ensures that legal regulations in customs and foreign trade can be complied with. The legal framework for international trade within the context of the current GTS customs and trade solution works especially well.

The challenge

In industrial organisations, a large proportion of the total costs are generated in logistics – with an increasing trend. Combined with the requirements for service quality, an enormous amount of operating and optimisation areas are revealed for organisations. Future-proof strategy and management consultation is required for customs and foreign trade issues.

The solution

PwC offers an affordable cloud solution for optimised customs and foreign trade processes, which seamlessly integrate into your SAP ERP landscape. PwC is the only company in the world that offers an SAP GTS OnDemand solution.

Due to our experience in the areas of compliance, customs, and risk management, you have a partner at your side who optimises and speeds up your business processes. Of course, we are also there for you if you want to outsource or monitor your GTS processes. You can concentrate on your core competencies.

SAP solutions for governance, risk and compliance

Compliance management

- Sanctioned party list screening
- Legal control export/import
- Embargo
- Classification/master data

Customs management

- Customs declarations import/export
- Despatch/presentation
- EMCS

² Can be managed by customer or by PwC.

Your benefits

The SAP GTS cloud solutions are an economic alternative to many other existing solutions in the OnPremise area:

- You receive all services from one sourced – only one contract partner.
- Due to the SAP GTS OnDemand that has been running since 2010, we are able to reduce costs by up to 46% in comparison to other alternative solutions.
- You use functions of the SAP GTS without the requirement to buy or install a complete system
- You have a low-cost and highly available high-end solution with the SAP GTS standard functionalities.
- You benefit from a scalable system and you can add further functions if they are needed.
- No activation of costs for licenses or hardware necessary for the SAP GTS OnDemand/SAP GTS as a Service solution.
- Avoidance of fines or legal consequences or withdrawal of customs authorisations/approvals.
- German- and English-speaking support and customs team.
